World's Finest Automotive Bra

Between a **Rock** and a **Hard Place**

It's a dilemma. Somehow you've got to maintain that finish. So, for protection from road ravages, do you mask your beauty's features with a standard black bra and still risk finish damage, or do you take it on the chin and get gouged on the road and at the body shop?

With tri-layer construction, the highest quality materials, and a 150 mph flap-free guarantee, our 100% hand designed and manufactured protective outerwear can handle road conditions found on the longest tours or the fastest tracks. Patent pending non-metallic fasteners, body conscious designs and complementary colors let us get between your hard places and those rocks with incomparable performance and eye-catching style.
